Rabbit anti-mouse Kchip4 Polyclonal Antibody Datasheet

Catalogue No	AI80008A
Product name	Purified rabbit anti-mouse Kchip4 polyclonal antibody
Product type	Primary antibody
Description	Rabbit anti-mouse voltage-dependent potassium channel-interacting protein 4 (Kchip4) polyclonal antibody
Target protein	Voltage-dependent K ⁺ channel-interacting protein 4 (Kchip4)
Immunogen	A synthetic peptide (KTSSPAIQNSV) corresponding to amino acid 47-57 of mouse Kchip4, conjugated with KLH for immunization.
Specificity	This antibody recognizes the 29kDa voltage-dependent K ⁺ channel-interacting protein 4 (Kchip4) in mouse brain extract.
Reactivity	Mouse, others not tested
Clonality	Polyclonal
Source	Rabbit
Formulation	Lyophilized in pH 7.4, 0.01M PBS. To reconstitute, add appropriate volume of dH ₂ O to reach a final antibody concentration of 1mg/ml.
Applications	Dilute approx. 1:300,000 for EIA Dilute approx. 1:1,000 for using in Western blotting to detect the 29 kDa Kchip4 in mouse brain extract.
Storage	Store in aliquots at -20°C. Avoid repeated freeze/thaw cycles
Research	Life science research.
References	If research is published using this product, please inform Anogen in order to cite the reference on this datasheet. Anogen will provide any product of choice as gratitude.

Experimental data

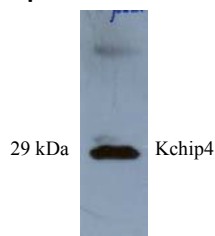

Fig.1 Western blot analysis of extracts from mouse brain using anti-kchip4 rabbit whole antiserum.

This product is for LABORATORY RESEARCH USE and further manufacture only, and can not be administrated to human and animals for use in diagnostic and therapeutic procedures.
